This document is designed to complement the Power point slide show presentation which documents issues raised against the STEP standard at the WG10 meeting in Kobe.

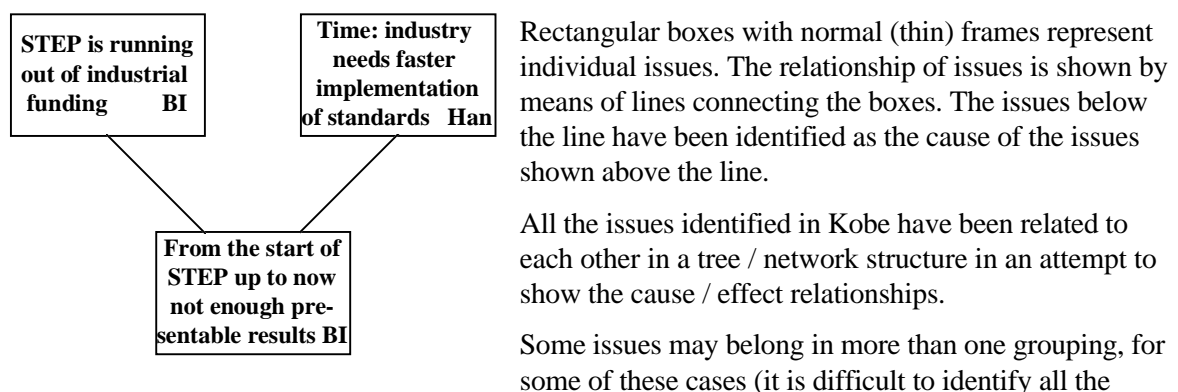

Around 130 issues were identified at the meeting. The slide show is an attempt to group those issues, and to show dependency relationships between the issues and groups of issues.

#### Structure of the Power point presentation:

Example 1:

Example 2:

cases) these issues have been included in both groupings. Whenever an issue is shown in more than once, all the subsequent instances of it can be identified by a dotted box and a reference to the first instance.

The originator of an issue has been identified by initials in the bottom right hand corner of each box. See the legend below for a full list of names. Where there is a question mark (?) instead of a name, the originator of the issue is unknown.

### **Legend:**

BI - Bernd Ingenbleek.

BW1 and BW2- Bernd Wenzel and Barbara Warthen (I don't know which issues belong to who?)

DP - Dave Price.

GS- Guenter Staub.

Han - possibly - Soon-Hung Han.

MRW - Matthew R. West.

NS - Nigel Shaw.

SVL - Stuart V. Lord.
